Wood Edges

Please check top shape for availability. Also note that wood edges add 3-4 weeks to the standard leadtime.

TableXpress Quickship Program
Wood edged tops are not available on our TableXpress program.

Care & Maintainence
Clean all surfaces with water-dampened soft cloth in the direction of the grain. Quickly buff dry.

Immediately remove any liquids that come in contact with the wood surfaces using a blotting action to absorb the liquid. Lift objects to move them. Never pull them across the finished surface. Avoid exposing furniture to extreme heat and cold or to wide humidity variances.

Avoid exposing furniture to strong sunlight. Exposure to sunlight over time will cause finish variation. Do not use soaps, commercial cleaners or harsh solvents as they will cause finish deterioration. If using a protective glass top, place spacer pads under the glass top to allow the wood to breathe.

Samples
Wood finish samples are available by request. Scans of these finishes are also available on tablex.com for reference, but because of variations in monitor and printer calibration we do not suggest specifying without seeing a physical sample.
