### Care & Maintenance

Clean all surfaces with water-dampened soft cloth in the direction of the grain. Quickly buff dry.

Immediately remove any liquids that come in contact with the wood surfaces using a blotting action to absorb the liquid. Lift objects to move them. Never pull them across the finished surface. Avoid exposing furniture to extreme heat and cold or to wide humidity variances.

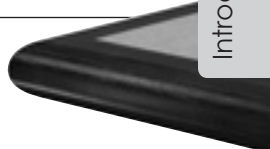

Avoid exposing furniture to strong sunlight. Exposure to sunlight over time will cause finish variation. Do not use soaps, commercial cleaners or harsh solvents as they will cause finish deterioration. If using a protective glass top, place spacer pads under the glass top to allow the wood to breathe.

### Samples

Wood finish samples are available by request. Scans of these finishes are also available on [tablex.com](http://tablex.com) for reference, but because of variations in monitor and printer calibration we do not suggest specifying without seeing a physical sample.

## ratchet height adjustability

Ratchet height adjustability is available on most tables in the VertiGo line... T-bases, X-bases, and even disc bases. Simply lift the top near the base's mounting plate, and the ratchet clicks into place. With a range of 9.45" the ratchet works in thirteen increments of .78". To reset to the lowest position just lift past its highest point.

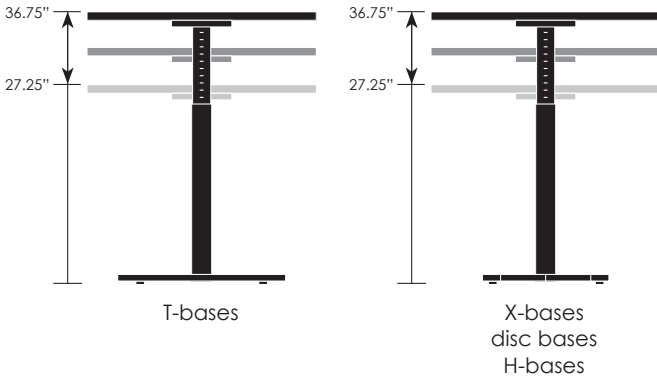

Want to use VertiGo on the go? The height of the base will be adjusted to ensure that the range of mobile tables is consistent with that of static tables.

**To specify:**  
All available ratchet models are priced in the following pages. They are denoted by the "RA" at the end of the model number.

**Example:**  
74TC2060T18RA-3P

**\$1,029** List Price

### nesting ratchet!

Ratchet height adjustability is also available on many of the nesting T-base models in the VertiGo line. All available nesting models are denoted by the "NE" at the end of the model number. To add the ratchet option to those models, change the "NE" to "NERA" and add \$400 to the list price.

**Example:**

counter balanced & short balanced height adjustability

Counter balanced tables go from seated-to-standing height, while the short balanced goes from coffee-to-seated height. Available on tables using single column disc or X-bases, these tables are easy to adjust. Simply squeeze the small handle underneath and gently move the top to your desired height. It's that easy.

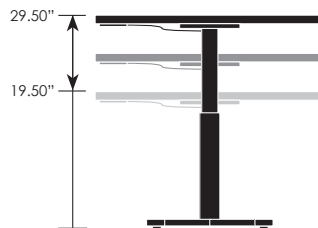

Want to use VertiGo on the go? Simply add 2" to each vertical measurement to account for the added height of locking casters.

**To specify:**  
All available counter balanced models are priced in the following pages. They are denoted by the "BL" or "BLS" (for short balanced) at the end of the model number.

**Example:**
