Care & Maintenance

Clean all surfaces with water-dampened soft cloth in the direction of the grain. Quickly buff dry.

Immediately remove any liquids that come in contact with the wood surfaces using a blotting action to absorb the liquid. Lift objects to move them. Never pull them across the finished surface.

Avoid exposing furniture to extreme heat and cold or to wide humidity variances. Avoid exposing furniture to strong sunlight. Exposure to sunlight over time will cause finish variation. Do not use soaps, commercial cleaners or harsh solvents as they will cause finish deterioration. If using a protective glass top, place spacer pads under the glass top to allow the wood to breathe.

Counterbalanced & Short Balanced Height Adjustability

Counterbalanced tables go from seated-to-standing height, while the short balanced goes from coffee-to-seated height. Available on tables using single column disc or X-bases, these tables are easy to adjust. Simply squeeze the small handle underneath and gently move the top to your desired height. It's that easy.

Want to use VertiGo on the go? Simply add 2" to each vertical measurement to account for the added height of locking casters.

To specify:
All available counterbalanced models are priced in the following pages. They are denoted by the "BL" or "BLS" (for short balanced) at the end of the model number.
